Project Profile

US Bank (BFS)

PROJECT DESCRIPTION:

The Project Objective is to redesign the reuseable portal from many portals into a single portal with a better user experience. This portal's core user categories include Designers, Developers, Product Managers, and Agile. Understand the user behavior & journey in the current market. Create a single reuseable platform for SRPR. Provide end-to-end solutions and implement the latest design trends and standards in all web application mobile application and websites.

ROLES AND RESPONSIBILITIES:

At US Bank, I led the redesign of the SRPR multiple platforms into a single, enhanced user experience as a Senior Designer. My role encompassed gathering requirements from product managers, conducting secondary market research, and developing key design deliverables, such as personas, journey maps, IA, user flows, and wireframes. This culminated in a responsive visual design implementation optimized for both desktop and mobile.

BCBSMA
Healthcare

PROJECT DESCRIPTION:

The Project Objective is to create better user experience for BCBSMA consumer products. To research and develop software without much coding. Understand the user behavior & journey in the current market. Create a design system and maintaining. Provide end-to-end solutions and implement the latest design trends and standards in all web application mobile application and websites.

ROLES AND RESPONSIBILITIES:

As a Senior Designer took the responsibility of create Design System and maintaining, understanding the requirement by communicating with Product Managers to ensure that designs are accurately reflecting the desired message and effectively express information with branding guidelines. Responsible for creating application that solve the client problem and reduce the human effort and production cost. All solutions are converted to proper visual solutions that are compatible with all devices like Desktop and Mobile.

Victory Capital
Management

PROJECT DESCRIPTION:
